

# MUSICAL MATHEMATICS

## SKIP COUNTING (Multiplication Facts)

Featuring Liz Robinson and Friends

### ABOUT MUSICAL MATHEMATICS

Educational Dynamix, a provider of innovative programs that fulfill “No Child Left Behind” guidelines, has developed *Musical Mathematics*.

Because children love music and are naturally drawn to rhythm, the *Musical Mathematics* series uses children’s innate appreciation of music to help increase their knowledge of mathematical content.

The *Musical Mathematics* audio CD contains mathematically-themed songs – filled with rhythm and spirit – to teach children the mathematical concept of “skip counting.”

### ABOUT THE SONGS

Children are motivated to learn when they enjoy what they are doing. The songs of *Musical Mathematics* allow instructors to add energy and excitement to math lessons through singing and active engagement.

Several genres of music spanning numerous cultures and rhythmic experiences allow for diverse and effective methods of teaching math concepts that help promote learning and memory.

Each of the songs on the CD were written and performed by singer/songwriter Liz Robinson accompanied by a choir of children.

### INSTRUCTIONAL RESOURCES FOR EDUCATORS, PARENTS AND STUDENTS

Instructional guides provide information to help teachers and parents use *Musical Mathematics* to deepen students’ understanding of mathematical concepts and enrich their overall math experience.

The three Activity Books for Grades K-2, 1-3 and 2-5 engage students in learning multiplication facts while simultaneously integrating other mathematical content areas. Children will benefit from using number sense, numeration, algebra, and other mathematic skills as they work with multiplication.

Teacher Guides provide detailed instruction on how to implement *Musical Mathematics* in the classroom.

### The Musical Mathematics Classroom Bundle contains:

- 1 CD of songs
- 1 Teacher Guide
- Student Activity Books (available in sets of 10 or 20)
