

TAKS 11 SOFTWARE DEMO

Installation: Insert Demo CD into drive and select the desired demo install file. Once the installation is complete, the CD may be removed.

Overview & Tutorial: Click these icons to display the Overview, Tutorial or State Standards Chart. Each of these may also be printed if desired.

To Start: Double click on the desktop icon to start application. The initial Test Start Screen is shown below. To start the demo test session: Click LOGIN. You do not need to supply a student name or password – simply click the second login button on the login window to begin. Next, choose the desired test mode by clicking the Learning Mode or Testing Mode buttons which will start the session.

6 of 12 Mark Question Text Size Help

6) The diagram below suggests that at dawn the sun appears higher in the sky than it actually is. Which property of light explains this phenomenon?

Where the sun appears to be to an observer on Earth.

(A) diffraction
 (B) refraction
 (C) scattering
 (D) reflection

Mark the best choice. Show Hint Feedback < Back **Next >** End

The testing mode does not allow the student to change test options or question mix. In addition, the score and hints are not available during the test. The final score is presented at the end of the test in both the testing and learning modes with the option to print the student study guide based on missed questions.

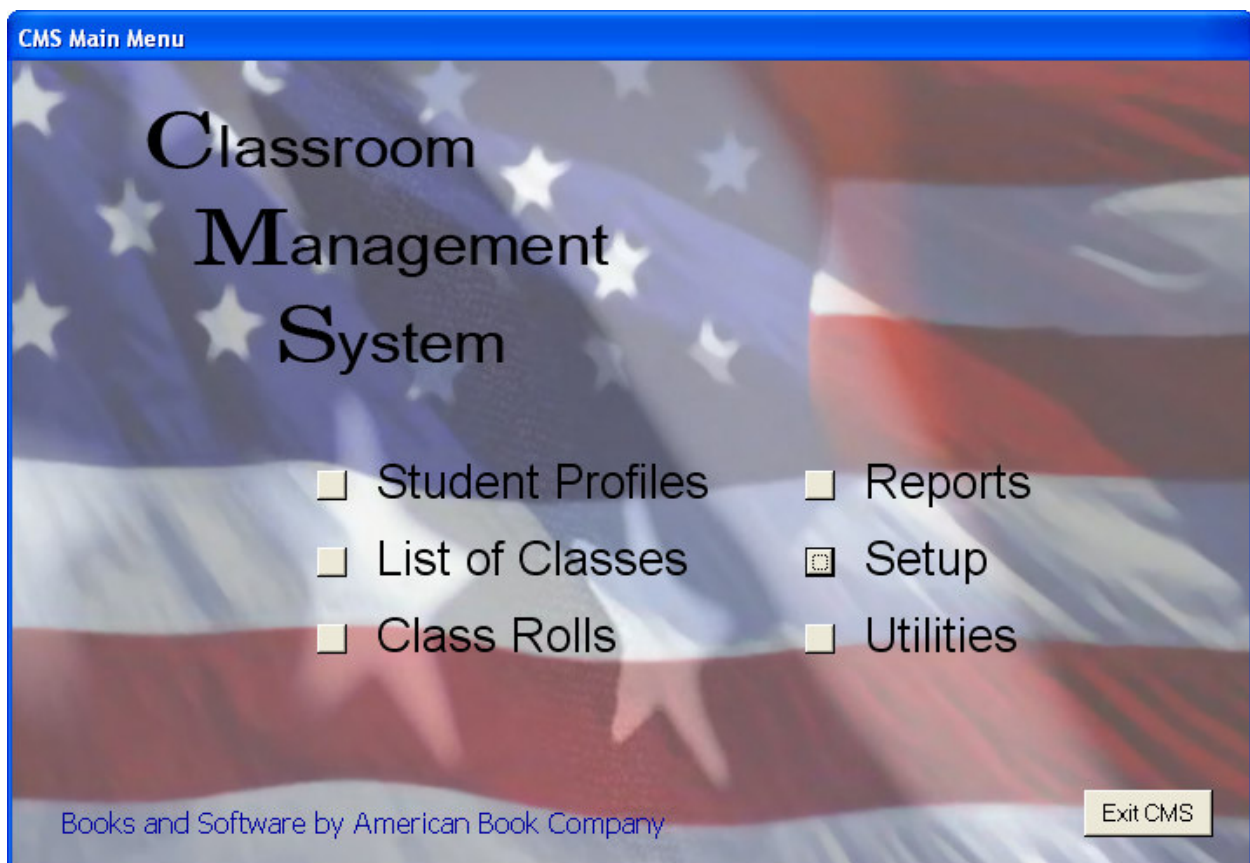

Features:**Student Test Prep Software**

- Interactive Learning Mode or Testing Mode
- Mark and review feature allows student to go back to marked questions at the end of the test session in order to try them again after completing easier questions first
- Resizable test screen text for easy reading
- Learning Mode Options
 - Practice student's weak areas by limiting question mix to one or more strands
 - Student selectable feedback options including sounds and cross references to ABC Review books
 - Student's cumulative score displayed during test based on questions attempted

- Question order shuffling can be turned on or off
- Hint button
- Tests can be ended at any point with score based on questions attempted
- Timed test sessions
- Randomized multiple choice answer order
- Individualized Score and Study Aid Report – includes scores by state standard strands and missed question references for review
- Student score history to view progress over time
- Comprehensive tutorial / help
- Color keyed TAKS 11 Strand Correlation Chart of test questions
- Complies with TAKS 11 question mix standards

Classroom Management System (not included in demo)

Track students progress and view or print detailed student performance reports for all students, groups, or individuals. Student performance history includes test scores and category breakdown for each test session. Filter reports by date range and up to six other key fields. Control access and assign student login ID and passwords. Export student statistics to Excel file.

System Requirements
